

## Quality Policy

Pearlson Shiplift Corporation is the leading drydock solution provider delivering and maintaining reliable, cost effective and sustainable Shiplift & Transfer Systems.

Our quality management system provides the framework to assure the effectiveness and continued improvement of our business processes, designs and products, ensuring that:

- We challenge ourselves with quality objectives, monitor our results and encourage recommendations for improvement
- Our designs are based on sound, first principles and our collective experience
- Our designs comply with the requirements of our customers and internationally recognized classification societies
- Our highly qualified Engineers are the most knowledgeable in the industry
